Benefit Dinner
August 14, 2009
Randall Oaks
Golf Club*

Dear Family and Friends,

As summer begins and we start planning for our Second Annual Golf Outing and Charity Dinner, we are extremely excited and hopeful about the amazing possibilities that lie in front of us. We truly hope to create another event which will not soon be forgotten.

All of us at Holly's Hope for a Cure were so very thankful for the generous support we received last summer at our inaugural event. We all have many fond memories from that day, a day which resulted in an incredible donation of \$50,000 to Northwestern Memorial Hospital. Members from Holly's Hope for a Cure presented this check to Dr. Diljeet Singh, who has since been busy utilizing our funds to develop a potential screening test for ovarian cancer, using a combination of evaluation methods with the ultimate goal of identifying curable ovarian cancer. We were also proud to set aside funds which will be made available to women who wish to have genetic testing because of a family history of ovarian or breast cancer, but who cannot afford the test.

As we look to the future our plans remain the same. Holly's Hope for a Cure will continue to move forward in fulfillment of our mission to eliminate ovarian cancer as a life threatening disease. Northwestern Memorial Hospital will once again be the beneficiary of the proceeds generated from this event.

Knowing that Holly's hope for a cure continues to live on in all of us, we invite you to help us achieve our goal. Please join us on Friday August 14, 2009. Play a round of golf. Sponsor a hole. Enjoy a nice dinner. Donate and/or participate in our raffles and silent auction.

Together we can make Holly's hope for a cure a reality for the estimated 20,000 women who will be diagnosed with ovarian cancer this year alone. Always remember, hope makes it possible!

Thank you!

Our Mission

Holly's Hope for a Cure, Inc. is dedicated to our purpose of eliminating ovarian cancer as a life threatening disease by advancing research, raising public awareness and improving the quality of life of ovarian cancer patients and their families throughout all stages of this disease.
